

POSEIDON CCX

CONCRETE EQUIPMENT CLEANER

POSEIDON CCX is an innovative low pH organic salt technology that replaces traditional mineral and organic acids such as sulfuric and their blends.

POSEIDON CCX uses an “on demand” technology that release the necessary amount of hydrogen ions (H+) to react with calcium scale and iron oxide to form water soluble ions, making Poseidon CCX a safer alternative to traditional acids with superior performance and cost advantages compared several traditional acids.

POSEIDON CCX is DOT non-regulated, non-corrosive to most metals, phosphate free, and a low contributor to BOD/COD in effluents.

POSEIDON CCX is non-aggressive to rubber materials and ferrous metals. Trucks cleaned with Poseidon CCX will maintain a better and newer appearance translating into much better trade-in value.

POSEIDON CCX APPLICATIONS:

- Industrial Descalers
- Household, Industrial, and Institutional Cleaners
- Concrete Floor Cleaners and Etchers
- Cement Trucks, Equipment, and Tools Cleaners
- Cleaners for Most Metals and Rust Removers
- Tile and Grout Cleaner
