GENERAL INFORMATION

POSEIDON COMPLETE, a water conditioning agent (Ammonium Sulfate)/Nonionic Surfactant Blend, is a low foam formula for use with pesticides that are labeled for agricultural, aquatic, forestry, non-cropland, and right-of-way uses. **POSEIDON COMPLETE** is formulated to meet the surfactant and ammonium sulfate recommendation for many glyphosate, glufosinate, paraquat, and diquat products or other herbicides requiring the addition of nonionic surfactant and ammonium sulfate. **POSEIDON COMPLETE** reduces potential antagonism and improves uptake of most nutrients in foliar applications.

DIRECTIONS FOR USE

Shake well before using.

POSEIDON COMPLETE may be used at a rate of 2.5-5.0% v/v (2.5-5.0 gallons per 100 gallons of spray solution). This meets Roundup® Original, Cornerstone® and similar product label requirements for 0.5-1.0% v/v nonionic surfactant plus 8.5-17 pounds of dry ammonium sulfate per 100 gallons of water. Follow herbicide label for specific rates, mixing instructions and other precautionary instructions. Do not mix **POSEIDON COMPLETE** with INTERLOCK® in an induction system or container when both products are undiluted. Once mixed in water, both products are compatible in either mixing order.
